

VSB Event Portal - Use Case Diagram

Official System Architecture & Workflows Submission

1. Student / Attendee Use Cases

- UC1: Browse & Filter Events** - Allows students to search active events by name and filter by categories.
- UC2: View Event Details** - Displays event coordinates, coordinators, rules, and remaining available slots.
- UC3: Register for Event** - Student submits registration form details to secure a seat slot.
- UC4: Upload Receipt** - Allows attaching payment screenshots for fee validation.
- UC5: Generate Event Pass** - Draws printable check-in pass containing student credentials and a QR code.
- UC6: Receive Ticket Email** - System dispatches verification ticket to student's email inbox.

2. Administrator Control Use Cases

UC7: Initialize Master Admin - Sets up first supervisor account if database is uninitialized.

UC8: Admin Panel Login - Private dashboard console authentication validation.

UC9: Create & Edit Events - Allows administrators to specify and edit details of event lists.

UC10: Change Registration Status - Toggles event registers status (Open, Closed, Completed).

UC11: View Analytics & Revenue - Dashboard showing total collection sums and registered seats statistics.

UC12: Audit Payment Proofs - Inspect student billing transactions and receipt screenshot uploads.

UC13: Modify Attendee Details - Correct student credentials typos directly in the rosters.

UC14: Delete Registration - Deletes registration documents and automatically restores event seats.

UC15: Export Roster to CSV - Download attendee details sheet as a spreadsheet spreadsheet.
